

# List of bicycle brands and manufacturing companies

This page lists [notable bicycle brands and manufacturing companies](#) past and present. For [bicycle parts](#), see [List of bicycle part manufacturing companies](#).

Many bicycle brands do not manufacture their own product, but rather import and re-brand bikes manufactured by others (e.g., [Nishiki](#)), sometimes designing the bike, specifying the equipment, and providing quality control. There are also brands that have, at different times, been manufacturers as well as [re-branders](#): a company with manufacturing capability may market models made by other (overseas) factories, while simultaneously manufacturing bicycles in-house, for example, high-end models.<sup>[1]</sup>

Only brands or manufacturers that are notable as a bicycle brand should be included. If no page exists for the company or brand, then the page to be linked to should be created first or a reference provided as to its notability or the entry will probably be removed.
